HEALTH EXAMINATIONS

PURPOSE: To set forth the District's policy regarding health examinations of students.

The Board recognizes that periodic health examinations of students may lead to the detection and treatment of conditions that impact learning. Health examinations also may help in determining whether special adaptations of the school program are necessary.

In addition to verifying that students have complied with legal requirements for health examinations and immunizations before enrolling in school, the District shall administer tests for vision and hearing tests and screening for scoliosis as required by law.

All students who participate as cheerleaders, song leaders, or athletes in organized competitive sports shall first undergo a medical examination or sports screening and file with the District a report of that examination or screening. Upon sustaining an injury or serious illness, a student may be required to provide a physician's written approval before participating further. This requirement does not apply to participants in occasional play day or field day activities.

The Superintendent or designee shall ensure that District employees who are employed to examine students exercise proper care of each student and that examination and screening results are kept confidential. Records related to these examinations shall be available only in accordance with law.

Reports to the Board regarding the number of students found through health examination and the effort made to address them shall in no way reveal the identity of students.

Adopted: 07/22/2009

Amended: 11/18/2020 (BP 2409 renumbered as BP 5141.3)
