SUMMER LEARNING PROGRAMS/SESSIONS

PURPOSE: To provide additional academic opportunities for District students in the areas of remediation, enrichment, and skill training.

The Board shall annually determine the establishment of summer school at the preschool, elementary, intermediate, secondary, and adult level. The regular session at the high school level shall be of duration necessary to ensure that participating students meet the time requirements for the granting of credit as established by the rules of the California State Board of Education.

The summer school curriculum shall include only those subjects authorized in the courses of study approved by the Board and such other courses of study expressly approved for summer school.

The Superintendent shall adopt an administrative regulation setting forth procedures for:

1. Evaluation and reporting on student progress.
2. Utilization of facilities.
3. Suggesting methods of instruction.
4. Staff assignments.

Such administrative regulation for the operation of the summer school shall be consistent with board policies and the operation of summer school shall not conflict in any way with the administration of the regular school sessions of the District.

The objectives of summer school are to:

1. Enrich schoolwork for students desiring a broader knowledge and deeper appreciation in the academic areas.
2. Permit high school students to make up course credits.
3. Provide standards-based instruction for those students in danger of not being promoted to the next grade.
4. Accelerate student progress by allowing students who have academically impacted schedules to take additional courses.
